Allows you to connect up to 16 steps Allows you to connect up to 16 steps Allows you to connect up to 24 steps Allows you to connect up to 16 steps Allows you to connect up to 24 degrees Allows you to connect up to 32 steps Allows you to connect up to 32 steps 3528 12V 4.8 Wm IP20 packing=5 meters in silicone Lamp led for aisles stairs furniture Lamp led for aisles stairs furniture Own production of controllers in Russia. 1 year warranty. Service. The products are certified. or as is popularly called smart ladder Each house stairs should be beautiful, comfortable and safe. This will help our device stair light series CAP. With our controller to automatically select the stairs, any stairs, even the old will look like at 200 and then 300% more beautiful. Particularly relevant led step lights if living in the house of the old parents or small children. There is nothing more important than their health. Even when your hands are busy you won't have to look in the dark switch now it's not needed since our smart ladder works by using motion sensors. This controller, illumination levels of the ladder smart ladder has a number of settings which allow you to individually adjust the smoothness on and brightness used LED lights and allows you to adjust the speed turn on and turn off the backlight. The controller is equipped with a photoresistor light sensor and the duty lighting at night as well as have the opportunity to establish a through circuit breakers. Our store has an own production in Russia and a guarantee of quality confirmed by the certificate of the TS. The choice is obvious In our series controllers to automatically select a CAP used motion sensors which have no analogues in the world market. These sensors do not require the reflecting surface represents a thin beam and installed anywhere, even where other known motion sensors are not working. Controllers CAP-16 CAP 24 and the CAP 32 are the best solution for a unique lighting of the stairs in a country house. Automatic illumination of a ladder can be used in the illumination of corridors and Park paths. Smart lighting ladder controller-based CAP led strip and motion sensors are a great solution
